

## Church Planter, Dentist

Reference number 8050

Continent South America  
Country Paraguay  
Duration More than 2 years  
Career Evangelism and Church Growth  
Priority Normal

Your dental training could be the vital link to bringing Jesus to the rural areas of Paraguay. The subsistence farmers of the region do have access to rudimentary dental care, but of such a poor standard that many people suffer unnecessarily. Your ministry would not just help their dental needs, it would also open the doors for you to share your faith and disciple new believers into fellowships that will one day form rural churches.

Rural areas are the last frontier of pioneer church planting in Paraguay. Many communities still have no gospel witness. SIM Paraguay is looking for dentists who have a passion for the gospel and are looking for ways to minister to human need through an integrated dental evangelism ministry. Opportunities abound for the dental professional's active involvement in a wide range of ministries, including evangelism, youth or adult discipleship, teaching and training and preaching, depending on interests and gifts.

Potential opportunities for dental ministry could include volunteer work in local health clinics, training of local dentists, equipping a vehicle for use as a mobile dentistry clinic, establishment of a stationary Christian dental clinic, working alongside medical professionals in medical/dental evangelism outreaches to outlying communities, or any combination of the above.

If you've had a dream to practice dentistry your way, Paraguay is the place for you. Be creative. Try something that's never been done before. If you are looking for an opportunity to put your faith into practice through dentistry, God can use you in rural Paraguay!
